Senior Vice President, General Counsel and Secretary
(510) 656-3333
(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017.

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

As provided for in Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD, a Conflict Minerals Report is provided as an exhibit to this Form SD and is available at <http://ir.synnex.com/financial-information/sec-filings>. The information contained on our website is not incorporated by reference into this Form SD or our Conflict Minerals Report and should not be considered part of this Form SD or the Conflict Minerals Report.

Item 1.02 Exhibit

The Conflict Minerals Report described in Item 1.01 is filed as Exhibit 1.01 to this Form SD.

Section 2 – Exhibits

Item 2.01 Exhibits

<u>Exhibit No.</u>	<u>Description</u>
1.01	<u>Conflict Minerals Report for the calendar year ended December 31, 2017.</u>

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

SYNNEX CORPORATION

Simon Y. Leung
Senior Vice President, General Counsel and
Corporate Secretary

Dated: May 31, 2018

Exhibit 1.01

CONFLICT MINERALS REPORT

OVERVIEW

This report for the reporting period from January 1, 2017 to December 31, 2017 has been prepared by SYNEX Corporation (the “Company,” “we,” “us” or “our”) pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended, and Form SD (collectively, the “Conflict Minerals Rule”). As used herein and consistent with the Conflict Minerals Rule, “Conflict Minerals” or “3TG” are columbite-tantalite (coltan), cassiterite, gold, wolframite and the derivatives tantalum, tin and tungsten, without regard to the location of origin of the minerals or derivative metals.

We are a leading business process services company, providing a comprehensive range of distribution, logistics and integration services for the technology industry and providing outsourced services focused on customer engagement strategy to a broad range of enterprises. We provide our products and services through two reportable business segments: Technology Solutions and Concentrix. Our Technology Solutions segment distributes peripherals, IT systems including data center server and storage solutions, system components, software, networking, communications and security equipment, consumer electronics, or CE, and complementary products. Within our Technology Solutions segment, we also provide systems design and integration solutions. Our Concentrix segment offers a portfolio of strategic solutions and end-to-end global business services focused on customer engagement, process optimization, technology innovation, front and back-office automation and business transformation to clients in ten identified industry verticals. Our revenues for 2017 largely were from distribution and global business services that were not in-scope for purposes of our compliance with the Conflict Minerals Rule.

PRODUCT SCOPING; REASONABLE COUNTRY OF ORIGIN INQUIRY; DUE DILIGENCE DETERMINATION

For 2017, a portion of the systems design and integration business within our Technology Solutions segment involved our manufacture, through assembly or integration, of data center servers and storage products. 3TG were necessary to the functionality or production of these manufactured products. Accordingly, these products were in-scope for purposes of our compliance with the Conflict Minerals Rule. Taken as a whole, our in-scope products contained all four 3TG, but each individual product did not contain all four 3TG.

We purchase only finished components and do not purchase 3TG directly from any smelter, refiner or mine. We have relationships with an extensive network of suppliers throughout the world, and we believe that there are generally multiple tiers between the mines, smelters, refiners and our direct suppliers. Therefore, we have requested our direct suppliers to work with their upstream suppliers so that they may provide us with information about the origin of 3TG in the components we purchase for inclusion in the products that we manufacture.

To determine whether any of the 3TG in the components contained in our data center servers and storage products originated in the Democratic Republic of the Congo or an adjoining country (the “Covered Countries”), or were from recycled or scrap sources, we conducted a “reasonable country of origin inquiry” (“RCOI”) within the meaning of the Conflict Minerals Rule, requesting that suppliers of the components we included in our manufactured products for 2017 complete the Responsible Minerals Initiative’s (“RMI,” formerly known as the Conflict-Free Sourcing Initiative) Conflict Minerals Reporting Template (“CMRT”), which includes questions regarding identified smelters and refiners in the supplier’s supply chain and the supplier’s compliance procedures. We determined that requesting that our suppliers complete the CMRT represented our reasonable best efforts to determine the mines or locations of origin of 3TG in our supply chain. Our RCOI utilized the processes and procedures contemplated by Steps 1 and 2 of the OECD Guidance (as defined below). Selected elements of those steps are discussed under “Due Diligence.”

Most of the suppliers that completed CMRTs provided data at the company level, with a small minority reporting at a level specific to the category of components that we purchased from them. Some suppliers indicated that 3TG contained in their components were not sourced from the Covered Countries, and some

suppliers indicated that their products contain 3TG sourced from the Covered Countries but from smelters which were certified as “Conformant” by an independent third party. There were also suppliers that indicated they used some recycled or scrap 3TG content in the types of components they sell.

After conducting an RCOI and exercising the due diligence described in this Conflict Minerals Report, as applicable, and in light of the limited information specific to our products provided to us by our suppliers, we concluded for 2017 that each of our data center servers and storage products contained 3TG of undetermined origin. Based on the information provided by the suppliers that completed CMRTs, we believe that the facilities that may have been used to process necessary 3TG contained in our in-scope products include the smelters and refiners listed in the Annex at the end of this Conflict Minerals Report and we believe that the countries of origin of the 3TG processed by such smelters and refiners may include the countries listed in the Annex. We endeavored to determine the mine or location of origin of the necessary 3TG contained in our in-scope products by requesting that the suppliers provide us with a completed CMRT and through the other procedures followed by us that are described in this Conflict Minerals Report.

DUE DILIGENCE

Our due diligence measures have been designed to conform, in all material respects, with the due diligence framework presented by the Organisation for Economic Co-operation and Development in the publication *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (Third Edition)*, including the related Supplements for gold and for tin, tantalum and tungsten (the “OECD Guidance”). The OECD Guidance has established a five-step framework for due diligence as a basis for responsible global supply chain management of minerals from conflict-affected and high-risk areas. Our implementation of the OECD Guidance in respect of 2017 is discussed below, but these were not all of the discrete measures that we took in furtherance of our conflict minerals policy (which is discussed below) or pursuant to the Conflict Minerals Rule and the OECD Guidance.

1. Establish Strong Company Management Systems

Our 3TG due diligence team was led by our Senior Vice President, General Counsel and Corporate Secretary, and our President, Hyve Solutions, and included subject matter experts from legal, finance, product management, and sales. We also retained specialist outside counsel to assist us with our compliance efforts.

We used the CMRT to identify smelters and refiners that were possibly in our supply chain. We maintain business records relating to 3TG due diligence in respect of 2017, including records of due diligence processes, findings and resulting decisions, on a computerized database, and relevant materials are preserved for appropriate periods consistent with the OECD Guidance.

We have a conflict minerals policy, which is available on our website at http://files.shareholder.com/downloads/SNX/0x0x758243/a29e58d8-4c8f-4ec3-a297-27eb9ac6c2cf/SNX_Conflict_Minerals_Policy_Statement05-23-14fnl.pdf (the “Conflict Minerals Policy”). The Conflict Minerals Policy sets forth our expectation that the suppliers in our supply chain procure 3TG responsibly and avoid sourcing that funds armed conflict contributing to the crisis in the Covered Countries. Our Conflict Minerals Policy also sets forth our expectation that our suppliers facilitate our efforts by providing us with appropriate information when we request, and conduct the necessary due diligence to identify smelters and refiners, from which the 3TG in their respective supply chains originate. We have a public email address (conflictmineralsinquiries@synnex.com) available on our website for general inquiries and grievances regarding our 3TG program and sources of 3TG. This mechanism serves as our grievance mechanism.

We do not support the embargo of 3TG from the Covered Countries and are supportive of suppliers continuing to source from responsible sources in those countries.

To further our efforts in identifying and assessing 3TG sourcing risks in our supply chain, we have included a 3TG flow-down clause in new supplier contracts that requires suppliers to provide us with information about the source of 3TG.

2. Identify and Assess Risks in the Supply Chain

To determine whether any of the necessary 3TG contained in our in-scope products originated in the Covered Countries, we requested that direct suppliers of the components we used in the in-scope products

complete the CMRT. We requested our suppliers' cooperation in gathering information from their respective suppliers.

We reviewed the completed CMRTs received from our suppliers. To the extent that a CMRT identified a smelter or refiner, we reviewed that information against the Smelter Look-up tab list of the CMRT and the list of "Conformant" and "Active" smelters and refiners published by the RMI. We also used the CMRT responses to review our direct suppliers' due diligence activities, such as whether they had a conflict minerals policy and required their own suppliers to source from Conformant sources.

3. Design and Implement a Strategy to Respond to Identified Risks

Senior management was briefed about our due diligence efforts. We have a risk management plan that outlines our responses in general terms to identified risks.

4. Carry Out Third Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain

In connection with our due diligence, we utilized and relied on information made available by the RMI concerning independent third-party audits of smelters and refiners. We do not have a direct relationship with any smelters or refiners and do not perform or direct audits of those entities within our supply chain.

5. Report on Supply Chain Due Diligence

This Conflict Minerals Report and our Form SD are available on our website and are filed with the Securities and Exchange Commission. Based on the information provided by our suppliers, we believe that the facilities that may have been used to process the 3TG in our products include the smelters and refiners listed in the Annex below.

ANNEX

Capitalized terms used and not otherwise defined in this Annex have the meanings set forth in the Conflict Minerals Report of which this Annex is a part.

Smelters and Refiners ⁽¹⁾

The following list includes smelters and refiners in user-defined “product-category” level CMRTs that we received. The list may not include all of the smelters and refiners that processed 3TG in the products that we manufactured for 2017 and may include smelters and refiners that processed 3TG in the general category of components a supplier sells but were not in the individual components we purchased from the supplier, as (i) the list contains only smelters and refiners confirmed as smelters and refiners by the RMI and their compliance status as confirmed by the RMI, (ii) not all of our suppliers completed CMRTs, (iii) many of the suppliers indicated that they only identified a portion of the smelters and refiners in their supply chain, and (iv) not all of our suppliers confirmed to us that their CMRTs were limited to only the individual components we purchased.

(1) We note the following in connection with the information contained in the foregoing table:

- (a) All compliance status information in the table is as of May 24, 2018.
- (b) “Conformant” means that a smelter or refiner was listed as Conformant with the Responsible Minerals Assurance Process’s (the “RMAP”) assessment protocols, including through mutual recognition. Smelters and refiners that are listed as “Re-audit in process” by the RMAP are considered to be Conformant by the RMAP. Included smelters and refiners were not necessarily Conformant for all or part of 2017 and may not continue to be Conformant for any future period. We do not have any information on the origin of the 3TG processed by any of the Conformant smelters and refiners prior to their respective compliance dates.
- (c) “Active” is a RMAP designation that means that the smelter or refiner is a participant in the RMAP and has committed to undergo an audit or is participating in a cross-recognized certification program.
- (d) “On Smelter Look-up Tab List Only” means that a smelter or refiner is listed on the Smelter Look-up tab list of the CMRT, but is not listed as “Conformant” or “Active.”
- (e) The compliance status indicated in the table is based solely on information made publicly available by the RMI, without independent verification by us.
- (f) “Country Location” is the location of the smelter or refiner and is based solely on information made publicly available by the RMI, without independent verification by us.

Country of Origin

The countries of origin of the 3TG processed by the smelters and refiners listed in the table above are believed to have potentially included the countries in the categories listed below. The categories are organized by risk. These may not be all of the countries from which the identified smelters and refiners have sourced, and the identified smelters and refiners may not have sourced from all of these countries.

L1 - Countries that are not identified as conflict regions or plausible areas of smuggling or export from the Covered Countries:
Argentina, Australia, Austria, Benin, Bolivia, Brazil, Burkina Faso, Cambodia, Canada, Chile,

China, Colombia, Ecuador, Eritrea, Ethiopia, France, Germany, Ghana, Guatemala, Guinea, Guyana, Honduras, India, Indonesia, Japan, Kazakhstan, Laos, Madagascar, Malaysia, Mali, Mexico, Mongolia, Myanmar, Namibia, Nicaragua, Nigeria, Panama, Peru, Portugal, Russia, Senegal, Sierra Leone, Spain, Thailand, Togo, United Kingdom, United States of America, Uzbekistan, Vietnam and Zimbabwe.

L2 - Countries that are known or plausible countries for smuggling, export out of region or transit of materials containing 3TG: Mozambique and South Africa.

L3 - The DRC and its adjoining countries: Burundi, Rwanda and Uganda.

DRC - Democratic Republic of the Congo.

Alternatively, or in addition, some of the identified smelters and refiners may have sourced from recycled or scrap sources.
